# **The Science of Advertising**

is the analysis, study, and practical use of the different forms of display and reference advertising publicity.

## **Display Advertising**

does not often produce the desire to buy at the time it is seen. It plants a seed of suggestion, but when the desire is realized it may be hard to find the ad which suggested it. Then one naturally refers to the Directory.

## **Reference Advertising**

places wherever people may look for you or your goods, information that will point to you like a signboard.

## **Your Advertisement**

in this book, properly indexed under all headings which describe your business (which is equivalent to repeating the advertisement under each heading) is the greatest value for the money it is possible to get, when the nature and life of the medium is considered.

# Five Reasons for Directory Advertising

- 1.—Because the directory will bring the advertiser in touch with the entire population.
- 2.—Because directory advertising is recognized as the most effective and least expensive of any method of reaching all the people all the time.
- 3.—Because the directory is issued only once a year and your expenditure is based on advertising to cover the entire time.
- 4.—Because the directory circulates generally among all the people; although it may not be in use in the homes, yet every member of every home uses the directory in the nearest store or in the office or factory, almost daily.
- 5.—Because the directory is a credit and boost to a community because everybody is interested and represented in it.

Schwab Printing Co.

# Introductory

---

The Publishers take great pleasure in placing before the public the 1920-21 issue of the Bloomington and Normal City Directory, and trust that it will meet with their approval. We assure the public that nothing has been left undone on our part to make the book what it should be—a Directory that directs.

Not only is the Directory a very necessary and indispensable work for local usages, but it is a valuable means of extending throughout the country information concerning Bloomington, its advantages, resources and prospects, and it is a matter of more than ordinary importance to every individual that he be properly represented in this standard work of reference.

To gather the data and compile a volume of this character is no easy task. It requires much time, a well defined system, and incurs no little expense. Few people have any idea of the work it means and the tenacity it takes to publish a reliable Directory.

In preparing this book the Publishers have spared neither time nor expense, and if errors occur or a single name is omitted which should appear in the work, it is generally the fault of the public and not of the publishers, as every house is visited and it is not the publisher's or canvasser's fault if someone fails to give all the information or gives it incorrectly. The intentions of the Publishers are always for improvement, and you can always count on getting as accurate a Directory as circumstances will permit.

This issue of the Directory contains 20,350 names, which make the population of Bloomington and Normal, with suburbs, at a very conservative estimate over 36,000.

We wish to thank our patrons who have made this book possible, and the people of the city for their courtesy in giving information.

# Five Reasons for Directory Advertising

- 1.—Because the directory will bring the advertiser in touch with the entire population.
- 2.—Because directory advertising is recognized as the most effective and least expensive of any method of reaching all the people all the time.
- 3.—Because the directory is issued only once a year and your expenditure is based on advertising to cover the entire time.
- 4.—Because the directory circulates generally among all the people; although it may not be in use in the homes, yet every member of every home uses the directory in the nearest store or in the office or factory, almost daily.
- 5.—Because the directory is a credit and boost to a community because everybody is interested and represented in it.

# The Science of Advertising

is the analysis, study, and practical use of the different forms of display and reference advertising publicity.

## Display Advertising

does not often produce the desire to buy at the time it is seen. It plants a seed of suggestion, but when the desire is realized it may be hard to find the ad which suggested it. Then one naturally refers to the Directory.

## Reference Advertising

places wherever people may look for you or your goods, information that will point to you like a signboard.

## Your Advertisement

in this book, properly indexed under all headings which describe your business (which is equivalent to repeating the advertisement under each heading) is the greatest value for the money it is possible to get, when the nature and life of the medium is considered.
